

IN THE NAME OF GOD

TALA Token(1ozt) Whitepaper
The Safe & Modern Face of Gold

Introduction

TALA is gold itself, a symbol of glory, stability, and sustainable wealth whose long-term value has always been on the rise over time. However, traditional methods of storing and investing in gold face many challenges.

Therefore, we decided to combine the authenticity of physical gold with the highest modern technologies to redefine gold in today's era. The TALA Token (1ozt) is a token backed by over 100% of physical gold, and its development is a significant step toward our vision of "creating endless glory and a bright future in today's world with the credibility of gold, innovative investment, and modern technology."

The TALA is a utility token and gold-backed, offering gold as a modern and contemporary asset in a digital platform with quick liquidity, complete transparency, and easy conversion to physical gold with authenticity and standards.

Intrinsic and Fixed Features of the TALA Token

Backed by Over 100% Physical Gold: The token economy is structured to ensure that 100% of its assets are backed by 24K 999.9 gold bars, meticulously produced by Dotone Gold Co. Each gold bar carries a unique identification and verified authenticity. Beyond this fully backed reserve in the banks and offices, additional 24K 999.9 one-ounce gold bars, also produced by Dotone Gold Co., are allocated to facilitate the seamless conversion of TALA Tokens into physical gold bars, ensuring reliability and accessibility for token holders.

Storage of backing gold in the banks: More than one hundred percent of the backing gold for the TALA Token will be stored in Dotone Gold Co's Offices and reputable banks under contract with the company.

Quick liquidity: The TALA Token can be quickly liquidated and converted to other assets in accordance with the laws of the country through the exclusive platform of Dotone Gold Co. and other reputable domestic and foreign systems.

Secure and free storage of gold: The TALA Token incurs no costs for its creation and maintenance.

Universal gold platform: This token is made available to everyone through the application and website of Dotone Gold Co.

Security and risk management: To ensure the security of the token and gold, as well as to manage risk, extensive strategies have been designed and implemented regarding how to store gold, programming, and audits by specialized institutions.

- Beyond the required backing for token issuance, more gold will be available for requested physical gold at Dotone Gold Co's offices and its partners
- Smart contracts ensure that gold reserves are provable transparently and automatically.

Fast and Secure Blockchain Platform

The TALA Token (1ozt) utilizes advanced technologies and credible blockchains to ensure transparency, security, and fast performance.

Blockchain and Smart Contracts

1ozt has been developed on the Binance Smart Chain (BSC), which offers high speed, low costs, and excellent scalability. This blockchain is ideal for financial applications and digital tokens, ensuring that TALA Token transactions occur on a fast and stable network.

Technical Features of the TALA Token Blockchain

To ensure transparency, security, and traceability, the 1ozt smart contracts have been audited by reputable security companies like Certik and Slowmist. These contracts automatically and provably record all transactions on the blockchain.

Security and Risk Management

To ensure maximum security and stability, 1ozt has implemented multiple protective measures, which include:

Smart Contract Security

- Reviewed by independent security companies (Certik and Slowmist) to prevent vulnerabilities.
- The smart contract code is transparent and unchanged to build trust.

Under supervision and authorization of legal entities

- The integrity of activities and storage of backed gold is verified by legal entities and necessary permits are obtained.

Storage and Protection of Token and Gold

- 100% of the gold backing the TALA token are Stored securely in Dotone Gold Co's Offices and reputable banks under contract with the company
- Insurance coverage for all stored assets.
- Regular audits conducted by independent auditing firms to verify gold reserves.
- The company Dotone Gold keeps the tokens in a cold wallet and uses a multi-signature structure for large transactions.

Fraud and Hacking Prevention

- Multi-signature authentication for high-value transactions.
- Use of cold storage solutions for managing reserves.
- Compliance with KYC/AML regulations for institutional investors.

Liquidity Strategy and Market Making

1ozt is designed as a digital asset with very high liquidity and follows a structured market-making strategy:

- Gradual release of tokens to prevent market fluctuations.
- Collaboration with reputable domestic and international exchanges for continuous transactions.
- Integration with DeFi liquidity for decentralized trades.
- Contracted banks with Dotone Gold Co. play a key role in distributing bars.
- Price stability is managed through a combination of algorithmic market making and institutional liquidity providers.

Token Supply and Release Strategy

- The total supply of tokens is fixed at 3,220,000.
- The initial unlocked tokens equal 32,200.
- The remaining tokens will be locked in the company's wallets and will be released after the physical gold backing is stored and verified by banks.
- Token burning will not occur.

Roadmap

- Token launch through the website and other products of the company
- Possibility of purchasing tokens and receiving physical gold bars by visiting branches of banks contracted with Dotone Gold Co. and offices of the company.
- Trading on secondary markets of token on reputable exchanges and the products of the company
- Development of lending and profit-making with gold

Conclusion

- 1ozt is more than a token; it is a redefinition of gold in the modern era and shapes the future of secure investment, storage, and trading of gold.
- True ownership of gold with blockchain transparency.
- Instant liquidity on the blockchain.
- Easy and transparent conversion of tokens to authentic and premium gold in the banking network.
- Gold storage without cost and risk.
